

MEADOWBROOK BASEBALL TOURNAMENT

The baseball tournament held at the Meadowbrook ball grounds last Friday afternoon proved to be an afternoon and evening of very good sport, although the crowd at the afternoon games was rather small.

The first game was played between Arrowwood and Meadowbrook and went nine innings. Meadowbrook made a run after run until the beginning of the ninth when they were some eight runs ahead. At the beginning of the ninth with Arrowwood at bat Meadowbrook blew up entirely; the ball was batted all over the landscape and when fielded were thrown to the wrong place or thrown wild and those who tried to catch the ball could not hang on to it. Arrowwood immediately saw its opportunity. The players and fans on both sides began to get excited and Jack McArthur was called upon to pitch and when Arrowwood was finally retired the score was tied. With both teams wrought up to such a stage of excitement it was a foregone conclusion that Meadowbrook would certainly score. With a man on base Benton hit the ball a bliff that brought the runner home and landed him on second base, which finished the game in favor of Meadowbrook.

The Milo team not having put in an appearance, Arrowwood and Cluny played off to see who would play Meadowbrook. Both teams put up a splendid game for the seven innings which the game was scheduled to go. At the end of that time the game stood 4-3 in favor of Cluny.

Cluny made the first run in the second inning, and one in the fourth, these runs were made by Royal Burrows, one in the fifth by Stacker and the last one in the seventh by Walker.

Arrowwood made a home run in the fourth by D. Lyle. One run was made in the fifth by Sutton and another run was made in the sixth by D. Lyle.

The final game between Cluny and Meadowbrook began shortly after 6:30. Excitement ran high as the game started. Two umpires ruled this game and only one or two minor disputes arose, which were settled in big time. A larger crowd was on hand to see this game, and one spectator named L. Long, from Queens-town, sitting about thirty feet away was struck by a foul ball on the left side of the face. The ball hit his cheekbone and peeled the skin off. It was a terrible blow but did not knock him out. Allen Quennell, the Meadowbrook catcher, had a legiment in his leg torn in the first game, but pluckily played the last despite the pain, as Meadowbrook had no other man to fill his position.

In the first inning Cluny scored three runs by Walters, Stepan and B. Burrows, and Whitting scored in the second and in third B. and Royal Burrows each scored. Cluny made no more runs until the 7th when Roy Burrows counted one and in the 8th Whitting scored another run, while in the 9th inning B. Burrows scored still another, making a total of 9 for Cluny.

Meadowbrook did not get beyond second base until the third inning, when Mace and Ad. Wilson scored a couple of runs. Not until the seventh did the Meadows score again, when Mace and Ad. Wilson repeated with another two counters. In the ninth inning the home boys scored up four runs from James, Quennell, Wells and Raycroft—total of 8 runs.

Thus the game ended 9-8 in favor of Cluny.

During the afternoon and evening hot dogs, coffee and ice cream were served and greatly appreciated.

After the tournament the light fantastic was tripped in the Meadowbrook Community Hall until the small hours of the next morning, the crowd being variously estimated from 200 to 300.

SHOULDICE ITEMS

(From our Own Correspondent)

Mrs. Weiburg is to be hostess at the W. I. meeting August 13th.

Mr. P. B. Lewis enjoyed Sunday tea with Mr and Mrs Harp August 2nd.

Mr. P. Brown has built a large barn and is giving a dance on August 4th.

Mr. and Mrs. John Mason and boys visited at the home of Mr. Frank Hall on Sunday August 2nd.

Mrs. Harp and children spent last week in Lomond renewing friendship made during homesteading.

Mr. McKay is re-modeling and adding to the dwelling house on his farm occupied by Mr. and Mrs. Leadbeater.

Harvesting is going on and crops are very heavy. Farmers are expecting to use from 2 1/2 to 3 pounds of twine per acre.

If in need of jack rabbits come to Shouldice. We have them in great numbers and in all sizes and a few gophers—just a few.

The Women's Institute entertained the children at the home of Mrs. G. Harp. There were about 28 children present and all enjoyed the day immensely.

At our last Institute meeting in the Hall, Mrs. R. F. Williams, one of our guests, favored us with a few selections on our new piano, which were enjoyed by all and we thank Mrs. Williams for her kindness.

We regret to report the absence of Mr and Mrs Farquharson from our midst as both took an active part in the community life of Shouldice. They have secured positions near the Union Jack school for the present and later expect to reside in Arrowwood.

The school inspector wrote our school secretary advising the board to start school about Sept. 1st and if necessary to use some unused building until the school is erected. He also enclosed an application from a teacher applying for the teacher's position.

At the Institute meeting held in the Crum hall with Mrs. Farquharson as hostess there were in all 13 children all under seven years of age. Mrs. Hall gave a reading on "Child Welfare". Our next meeting will be at the home of Mrs. G. E. Harpe. Mrs. Leadbeater will favor us with a paper on "Education and Better Schools."

BEE-KEEPING PROMISES TO BE ONE OF ALBERTA'S GREAT REVENUES

Bee-keepers of Central and Northern Alberta held a meeting in Edmonton the past week and made the preliminary plans for an organization in this part of the province to affiliate with a province-wide organization. The gathering was addressed by Frank C. Pellatt, editor of the American Bee Journal, of Hamilton, Ill., and by R. M. Newton, president of the Manitoba Bee-keepers' Association. Mr. Pellatt made the prediction that in ten years Alberta would be shipping out honey to the world's markets by the carload. He believed that Alberta had more possibilities in this way than almost any other section of Canada or the United States.

A recent census of Edmonton taken by the civic authorities shows a population of 65,378 in comparison to 58,000 in the Federal census of 1921. Calgary is crowing now over a few thousand more.

ALBERTA'S FREIGHT RATE CASE LINEUP

The Province of Alberta will present a united front to the Railway Commission on the question of the freight rates when that body commences its general investigation into the question.

At a conference held in Edmonton last Wednesday at the instance of the Alberta Government, at which representatives of the Boards of Trade of Edmonton and Calgary and of other interests were present, the following general points were decided upon for presentation to the commission. Alberta's counsel in the enquiry will be S. E. Woods, K.C.

That the standard of mileage freight tariff scale should as far as possible be on the same basis all over Canada. That the distributing town tariffs should continue as at present, namely, 85 per cent of the standard mileage basis in the West.

That the charge for any commodity to Calgary and Edmonton from Eastern Canada should not be greater than that charged from the same points to Vancouver.

That the basis of exports rates on grain and flour applicable to Fort Willia should apply to the Pacific coast.

Reduction in coal rates to develop markets east and west.

Adjustment of export rates via both seaboards in order to develop further markets for the primary products of Alberta and for necessary reductions in import rates to meet the requirements of the province.

Adjustment of class rates on the shorter C. N. R. mileage.

Adjustments of rates as between distributing centres.

The matter of details in regard to equalization of rates generally and the securing of commodity rates suitable to the needs was left in the hands of a small committee consisting of the chairman, Mr. J. H. Hanna secretary Calgary Board of Trade; A. Chard supervisor of traffic for the Alberta government and S. B. Woods, counsel for the Province of Alberta.

A thorough discussion of the many points at issue took place and an amicable solution reached by the conference in all cases. All interested expressed themselves as well pleased with the results of the meeting.

"WHEN A MAN'S A MAN" AT GLEICHEN

Saturday Next, August 8th

Harold Bell Wright has long been considered one of the most popular authors in the world. His many novels have been read and re-read by countless millions.

At the Gleichen Community Hall on Saturday, Aug 8th, the big picture "When a Man's a Man" will be presented to all movie lovers. This gripping story of the great Arizona ranch country is said by those who have had the pleasure of seeing the picture to be one of the big outstanding features of the year.

"When a Man's a Man" is one of the most popular of all Harold Bell Wright stories. Its circulation is said to have reached over two million copies and a conservative estimate of those who have read the story can be placed in the neighborhood of the five million mark.

The story deals with the determination of a Cleveland "son of the rich" who goes west to make a man of himself after having been spurned by the girl he planned to wed. The situations that surround his entry into the desert and cattle land how he overcomes pride and pitches in as a ranch hand, and after he finally succeeds in gaining his goal, lead to make one of the most intense and interesting stories that have yet come from the pen of that famous author.

GLEICHEN RESULTS GRADES IX, X, AND XI EXAMINATIONS

Appended are the names of the successful Gleichen students in Grade IX, X, and XI.

GRADE IX
Harvey Menard.
Elmer Bolinger.
Ella Sanders.
Clarence Harrington.
Victor Ramberg.
Lyle Robinson.
Passed conditionally:
Lillian Hutcheson.
Mary Wilson.
Frances Thorssen.
John Clark.

GRADE X.
Eddie Holland and Jean Cook are required to re-write two subjects.

GRADE XI.
Hugh Beach.
Charlie Woods.
Vivian Brown.
Helen Matthews.
Sara Cook.
Mary Cook.
Amy Palmer.

TOWN AND DISTRICT

Mrs. H. West, of Calgary, has been visiting for a few days Miss J. Gooderham.

Mrs. Gordon P. Muir, of Calgary, stopped for a short time at the home of Mrs. T. H. Beach before leaving for Ontario.

Last night the local Masons, assisted by the Eastern Star, gave a banquet in honor of Rev. Canon Stocken, a report of which will appear in our next issue.

Mrs. A. E. Williams, accompanied by her daughter and son, came down from Calgary Tuesday to look over her farm property in the Gleichen district, and will return home today.

Rev. Canon Stocken arrived from Victoria, B. C. last Wednesday and has spent the past week meeting his many Gleichen friends. He leaves today to visit his daughter on the shores of Kootenay Lake.

The Masonic parade to St. John's Church Sunday afternoon was attended by a fair number of brethren, when the Rev. Bro. Canon Stocken preached a very appropriate sermon. The extreme heat that afternoon undoubtedly kept many at home.

Rev. Matheson, wife and family arrived in Gleichen Monday by motor and this morning continued their journey to Banff, where they will spend their vacation. Mr. Matheson is now located at Redcliffe. Their numerous Gleichen friends were pleased to see them once more.

In every part of the district harvesting has begun and by next week will be general throughout the entire district. The continued hot weather has had some effect on the wheat and it will not be as heavy a crop as was first expected, but, nevertheless, will be a good one. A trip through the district at the present time is well worth while and a grand sight.

WORLD HAPPENINGS
BRIEFLY TOLD

It is rumored that the Ontario Government is considering an increase in dues on timber cut in crown lands.

The national research council at Ottawa announced that A. D. McLay, of the University of Toronto, has been awarded one of three fellowships having a value of \$1,200.

Col. J. Obed Smith, former Canadian superintendent of emigration in London, has sailed for Canada. Col. Smith intends spending several months in the Dominion.

Right Hon. Austen Chamberlain, the foreign secretary, announced in the House of Commons that the British Government does not propose to send troops to Tangier, Morocco.

For the first time in eleven years, Toronto, Ont., during the month of June was free from motor fatalities. Since 1914, 42 persons were killed by automobiles during the month of June, seven in 1922 and seven in 1924.

According to immigration officials at Niagara Falls, Ont., 91 Canadians returned from the United States during June. In addition, there were 71 other nationalities came through to Canada. There were 196 rejections.

Hon. Dr. Forbes Godfrey, minister of health, has returned to Toronto from Geneva, where he investigated the work being done by Henri Spahlinger with his tuberculosis serum. He says he was much impressed.

Prediction that England will be driven to nationalization of the coal mines "in order to save the mining industry" was made at the annual conference of the Miners' Federation at Scarborough.

The Prince of Wales played the part of a heroic fireman at Kalua, Rhodesia, when he assisted settlers in extinguishing a fire in a native wood and grass children's house at the Fauna agricultural show. All of the children were rescued.

Urge Marines To Revolt

Red Propaganda Directed At British Fleet Visiting Norway

The arrival of a British fleet for a visit to Oslo was marked by intensive demonstration by Norwegian communists. Secret appeals were made to the bluejackets and the marines.

"Rise in revolt rather than obey your government if you are ordered to make war on Russia," was one message floated in the face of the British tars by local communists.

The appearance of the inflammatory propaganda directed at the British fleet visiting Norway was resented deeply by the Norse Government as well as the British officers of the fleet. Russia has objected to the presence of a British fleet in northern waters and this propaganda is taken to have been inspired by Moscow.

Victim Of X-ray Research

English Doctor Forced To Give Up Practice Is Dangerously Ill

Dr. T. H. Sanderson Wells, of Weymouth, an X-ray martyr, has had to give up practice and go into a London nursing home for an operation in which his life is at stake.

Throughout nearly the whole of his professional life, Dr. Wells has been handicapped by injuries he received in the early days of his career in experimental X-ray research, by which he was badly burned in the leg.

Dr. Wells is one of the best-known surgeons in this part of the country, but few have known of the intense pain and crippling disability which he suffered in recent years.

Constantinople Hears U.S. Signals

Clear transmission of signals to Constantinople, a distance of more than 5,300 miles, is the latest accomplishment of a short wave radio set, with which the navy department is experimenting at Lakeland, N.J. The set previously had been heard at Honolulu about 5,000 miles distant.

Was Well Helped

Mother.—Were you good at the party?

Six-Year-Old.—Yes.

Mother.—You didn't ask twice for anything at the table?

Six-Year-Old.—No, I didn't. I asked once, and they didn't hear me, so I helped myself.

Thirty employees are constantly engaged in dusting the 3,000,000 books contained in the British Museum library.

South Africa has recently provided special air-mail postage stamps for use in the new Capetown to Durban services.

While steaks, seaweed jelly and sharks' fins were among the delicacies served at a recent luncheon of the Paris Zoological Society.

MacMillan Forbids Much Talking

Men Soon Exhaust Topics of Conversation and Become Bored

It is not the cold, a lack of food or the loss of modern conveniences which make a trial of an Arctic expedition. It is solitude. The men get talked out. Commander Donald B. MacMillan on the expedition now enroute expects radio to be a great relief, but will not appreciably lessen his system of discipline in inter-personal communication.

On previous trips MacMillan has forbidden members of the party to talk to each other during the day or at dinner time, and to keep away from each other as much as possible.

"The isolation of that vast region soon exhausts all timely resources," MacMillan explained. "It is not long before the men know the life history of each other, that of their families and relatives and virtually everything else in connection with the ordinary man's life. When those subjects have ceased to be topics of conversation and the few other sources have played out, the men become a bore to each other. That leads into an unfavorable morale. So we talk as little as possible and keep our counsel by being aloof."

Making Paper From Asphalt

Is Waterproof and More Durable Than Ordinary Paper

Heavy paper is now being made by the use of asphalt. After the fibrous materials have been treated, to remove impurities, they are macerated, pulped with water and formed into sheets by pressure and dried by heat.

Much paper and cardboard for wrappers, cartons, and the like consists of a layer of cheaper material between sheets of better quality. The aim of the new process is to give a better product, made proof against water and vermin, and this is accomplished by substituting the asphalt layer for the inferior filling. This layer is a thin sheet of pulp into which an emulsion of liquid asphalt with a small amount of suitable clay and sufficient water are introduced.

One or more of the impermeable asphalt layers are used between the sheets of plain pulp, and the resulting heavy paper or fibro-board is claimed to be not only waterproof, but about twenty per cent. stronger and more durable than ordinary paper or pulp board of the thickness.

Link Lakes With Europe

Lakes-Sea Route Has Become An Accomplished Fact

The possibility of lake-to-sea and sea-to-lake traffic is no longer in doubt. The steamer *Helsa*, which anchored in the stream at Sarnia, Ont., for boiler repairs, after a 14-day voyage from Duluth, is evidence that the lakes-land route is an accomplished fact.

The *Helsa*, flying the Norwegian flag, is the second of a fleet of six steamers now plying between Europe and the Great Lakes. She is in command of Captain Nettleland and her port of registration is Bergen. She is 240 feet long, with light draught, and width to enable her to make the passage of the locks and navigate the inland seas without trouble.

The *Helsa* brought a cargo of stone, destined for some particular building operation at Duluth. Her sister ship, the *Agga*, the first of the Norwegian line to make the lake's trip this year, was loaded with a cargo of clay for Duluth.

Devoted Worker For Blind

Sir Frederick Fraser Died In Halifax July 5

Sir Frederick Fraser, superintendent-emeritus of the Halifax School for the Blind, is dead, aged 75. He had been critically ill for a week.

Free education for the blind, free postage on Braille and the Halifax School for the Blind, one of the foremost institutions of its kind in the world, stand out as three monuments to the life and work of Sir Frederick Fraser. His life was spent in seeking to educate the blind and to thus raise his fellow-unfortunates from the status of objects of charity to that of useful citizenship.

Public recognition of his worth was made in 1913, when he was publicly thanked by the Nova Scotia Legislature on completion of forty years' service as superintendent of the School for the Blind and again in 1915, when King George created him a Knight Bachelor.

On Scholarship Trust

Premier Baldwin, Geoffrey Dawson, editor of the *Times*; Sir Douglas Hogg, attorney-general, and E. R. Peacock, well-known London banker, who is a native of Canada, have been elected trustees for the management of the Rhodes Scholarships Trust. Rudyard Kipling has resigned his trusteeship.

Settlers Build Their First Home

European settlers building their first home on the lands of the British Dominion Land Settlement Corporation, north of Vermilion, Alberta.

Remarkable Land Settlement Plan

Influential British Company to Assist Settlers and Promote Colonization

The Vermilion district in central Alberta is this summer the scene of a remarkable and most promising development in land settlement. The undertaking referred to is that of the British Dominion Land Settlement Corporation Limited, a powerful financial organization formed in London, England, for the express purpose, as its name implies, of promoting land colonization in the Overseas British Dominions and particularly in this Dominion of Canada. This company represents a new departure in the way of assisting agricultural families of small means who desire to establish themselves on the soil. Backed by millions of Old Country money, it provides the right kind of farmers with land on easy terms and aids them in equipping these farms and getting thoroughly established thereon.

The high character of the company is indicated by the personnel of its British directorate, which includes: The Duke of Sutherland, chairman; The Right Hon. Sir Newton Moore, K.C.M.G., formerly prime minister of western Australia; the Right Hon. Sir Arthur Griffith Boscawen, formerly minister of agriculture in the British cabinet; Sir Edward Manville, chairman of the great Daimler Motor Car organization; Sir Robert Lynn, M.P.; Col. A. G. Cousins, O.B.E.; and Mr. Mervyn Brown. These names in themselves, furnish a guarantee of the standing of an organization which has for its object the use of British capital in assisting to develop and people the vacant spaces of the empire—an ideal which has seized the mind of the British people especially during the years which have succeeded the war.

In the United Kingdom it is more than ever recognized that the future of the Mother Country lies in the growth of the outlying parts of the empire. The Canadian board of the corporation is constituted as follows: Mr. Mervyn Brown, chairman; Mr. Robert McKay, of Allan, Killam & McKay, Winnipeg; Mr. W. H. Carter, of Carter, Hall & Aldinger, Winnipeg; Mr. W. P. Dutton, Winnipeg; and Mr. Isaac Pittblado, K.C., as special counsel. Mr. W. T. Badger is general manager.

To be specific, the British Dominion Corporation sells its land at fair prices and on fifteen-year terms, with no cash for three years except interest and taxes, the principal to be discharged during the remaining twelve years of the period. Besides giving land on such reasonable conditions, the corporation advances to settlers, having no livestock and equipment, two dollars for every one dollar put up by the settler for these necessities. For the money thus advanced the corporation takes back a five-year chattel mortgage on which only interest is payable for two years, thus leaving the principal to be discharged in the third, fourth and fifth years of the loan. To be acceptable to the corporation, the farmer must have a family or at least be a married man. The corporation is cutting and stacking logs for sale to settlers on five years' credit, thus making it easy for the newcomer to erect a shelter for his family without delay. Where it appears necessary, the corporation advances even food for the family and feed for the animals during the first months of occupation. Supervisors in the employment of the company constantly circulate amongst the settlers, keeping in touch with their needs and offering advice and assistance wherever such is called for.

It will thus be seen that the company offers an exceptional opportunity to (1) the married renter who possesses livestock and equipment and wishes to have a farm of his own; (2) to the married farm laborer who wishes to become a land owner; and (3) to the married farmer who, owing to his present unfortunate location, has suffered from drought, floods or frost. While the British Dominion Corporation intends later on to extend its operations to other parts of western Canada, it has chosen the fertile section of central Alberta as the scene of its first undertaking. In this area it has become the outright owner of 262,000 acres of land. Of this land about 150,000 acres consist of scattered sections, half-sections and quarter-sections lying between the Vermilion and Saskatchewan Rivers with the town of Vermilion as the chief distributing point. The rest of the company's holdings lie west and north of Edmonton. Driving north from Vermilion through the main east block, one encounters a series of rolling hills and valleys, the hills green with verdure and dotted with darker green clumps of trees and brushwood. The landscape is interspersed with small lakes and is thus an exceptionally attractive one. The prevailing soil is a black loam with a clay sub-soil.

The area is served on the south and north by two lines of the Canadian National Railways. As a result of the influx of settlers the Canadian National Railways is extending its St. Paul de Metis branch across the northern part of the company's property, and the Canadian Pacific Railway is extending its Lloydminster branch towards the west of the company's lands.

English Boy Has Peculiar Skin

Any Marks Show Clearly For Ten Of Fifteen Minutes

His unusual skin will always prove means of identification for a Dockhead schoolboy. The skin appears quite normal in color and texture, the same as that of other people, but it has the strange property of being able to retain for ten or fifteen minutes any mark made on it by slight pressure or any word scratched by a finger.

An examining doctor said the boy had a very peculiar skin which, when slightly stroked by the finger, showed definite marks. It was, he said, possible to write one's name on the boy's skin and the marks would remain for 10 or 15 minutes. A very slight caning would show "tremendous results." There were various explanations of this condition, one being that the person suffering from that condition was "one skin short."

Substitute For Glass

Latest Chemical Discovery Is Much More Transparent

The latest chemical discovery is a substitute for glass, made from purely organic materials. It seems to have many attractive properties, being much stronger than glass, so that it can be worked on a lathe into all sorts of required shapes. It can be colored for decorative purposes, but the most interesting thing about it is that its refractive index can be varied over a wide range, making it very suitable for optical instruments and capable of replacing very expensive kinds of glass in telescopes and microscopes. Another interesting optical point is that it appears to be much more transparent than glass to the invisible rays—ultra-violet and infra-red light.

Planning Antarctic Flight

Australian Explorer Hopes to Make Continuous Photographic Map

An Antarctic flight is planned by Capt. G. H. Wilkins, who recently returned from an eighteen months' exploration tour in northern Australia. The plan is to explore the coastline from King Edward the Seventh Land, south of New Zealand, to Graham's Land, south of Cape Horn. He hopes to make a continuous photographic map. He explains that the work is a preliminary to the inauguration of a comprehensive international scheme of Antarctic meteorology. Captain Wilkins, who was one of Australia's official photographers during the war, has distinguished himself by many daring feats.

Will Build Big Flour Mill

Spillers Overseas Limited announce that they will spend \$800,000 in the construction of a flour mill in Calgary, exclusive of machinery and other equipment. Work will be started as soon as possible, so P. Lloyd Tanner, managing director states.

Shorthand is one of the arts that have never been lost. A system was practiced in Phoenicia before the Greeks existed as a people, and possibly also in Babylon.

Discovers Strange Race

Explorer Finds White Indians In Jungles of Brazil

White Indians who evinced no surprise at seeing a hydroplane or other modern things, although armed with only bows and poison arrows and living nude in a primitive state, are among things Dr. Alexander Hamilton Rice has seen in Brazil.

On his return from his seventh expedition to Brazilian jungles, he told about finding the Indians at the headwaters of the Parma River, 75 miles distant from the headwaters of the Orinoco. Their faces were streaked with pigment, but they impressed the explorers as being undeniably white.

The Indians are undersized and speak a distinct language of their own.

"They move in and out between the trees like 'aguars without making a sound or causing a rustle of the leaves," Dr. Rice said.

They refuse to eat meat and subsist entirely on plants and bananas.

Mistakes In London Statues

Many Peculiar Errors Have Only Been Recently Noted

Peculiar mistakes in London's statues have been commented upon in a recent magazine article which notes the following facts: "The statue of the Duke of Wellington at the Royal Exchange has neither spurs nor stirrups. Gladstone, in the house, has a seam from one trouser leg, an oversight which flouts the best traditions of Saville Row. Cromwell, outside the House of Commons is wearing spurs upside down." And also asks: "What is the archer decorating the west side of the new County Hall doing with his bow in the wrong hand? Why does the soldier in the war memorial outside the Royal Exchange perpetually offend peace regulations by standing at ease with his hands covering the top of his rifle barrel? Why does the Prince Consort in Holborn Circus, raise his hat in salute?—a thing no self-respecting field marshal ever did."

ECLIPSE FASHIONS
Exclusive Patterns
by Lucille Bayne

An Attractive Version of the Over-blossom

Lace edgings and narrow tucks elaborate the tailored blouses of today. One cannot have too many attractive blouses to wear with separate skirts, thus creating the smartest two-piece frocks. The model pictured here was made of white crepe-de-chine with groups of narrow tucks in the front and back and opens all the way down the centre front. The round boyish collar is becoming and the full-length sleeves are finished with a tailored cuff. The pattern is perforated for short sleeves and provides an attractive cuff. The hipband may be omitted and the blouse tucked under the skirt-band in regulation shirt-waist style. Sizes 34, 36, 38, 40 and 42 inches bust. Size 38 bust requires 2 1/2 yards of 36-inch, or 2 1/2 yards of 40-inch material. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Each copy includes one coupon good for five cents in the purchase of any pattern.

Canada's Fish Day

Association Decides On Last Wednesday In October Of Each Year

By a resolution passed at the concluding session of the annual meeting of the Canadian Fisheries Association, the last Wednesday of October of each year will henceforth be known as Canada's fish day. Previously the annual fish day has been set by the association and selected at times only a few days before, giving little time for dealers to prepare for the additional business.

The resolution adopted, orders that co-operation with calendar makers be sought with a view to having the day marked in conformity with other feast days on the calendars of this country.

Another important resolution called for an application to the department of marine and fisheries for the constitution of a separate department to conduct the affairs of the fisheries, with a competent man at its head as deputy minister.

Left Without A Home

John D. Rockefeller, one of the World's Richest Men, is Now Homeless

Sales by John D. Rockefeller, Sr., of his estates at Pocantico Hills, and at Lakewood, N.J., of his town house and garage in New York, and of his winter home in Ormand, Fla., to his son, John D. Rockefeller, Jr., for a price "in excess of \$3,000,000," was announced recently.

The sale leaves one of the world's wealthiest men without a home of his own.

It also relieves John D. Jr., of the payment of heavy inheritance taxes which would be levied if the son were to come into possession of the homes after his father's death, but a representative of the family denied that the object of the deal was to evade the inheritance tax.

Find Primitive Human Skull

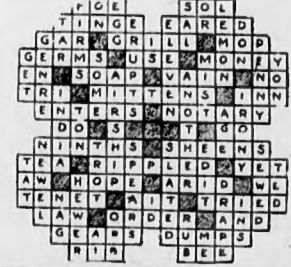

Discovery of Great Scientific Value Is Made Near Tiberias

An interesting discovery, in view of the anti-evolution trial in the United States, was made recently in a cave at Tabgha, near Tiberias, when a primitive human skull was unearthed among Mousterian flint deposits.

The skull, discovered by a British archaeologist and an Oxford student, is characterized by a prodigious development of the supranasal prominences and depressed forehead, as in the chimpanzee. It conforms slightly with the Neanderthal European type, not previously found on the continent of Asia. Prof. Garvand, director of the British School of Archaeology, Jerusalem, who witnessed the discovery, confirmed its scientific value.

Among the exhibits in the chemical section of the Wembley exhibition is a small tube of insulin, to obtain which 1,000 oxen had to be slaughtered.

Answer To Last Week's Puzzle

Preparing For Eventualities

France to Requisition All Resources In Case of New War

One of the principles of the new national defence plan which Premier Painleve of France has sent to the Chamber of Deputies is the right to requisition all the country's resources, not only material, but intellectual and scientific. This scheme of national organization has been prepared by the council of national defence, presided over by M. Boncour, and is designed to outline in advance what can be done automatically if, and when, war is declared, in order to avoid costly mistakes and confusion such as arose in the last war.

The plan deals with the distribution of labor and war materials and prescribes systems for transportation and the manufacture of munitions.

Plan Pageant Of Canada

May Be Held In Montreal In 1927 On Occasion Of Canada's Diamond Jubilee

Plans are going forward for a pageant of Canada to take place in Montreal in 1927 to commemorate the diamond jubilee of Confederation.

It is understood that a number of prominent citizens, including the chief executives of both railways and Hon. L. W. David, provincial secretary, are favorable to the scheme, and it plans reach any definite shape the Prince of Wales will be asked to open the pageant.

B.C. Mining

Mining circles in the Slokan district in British Columbia are elated over the fact that ore has been struck at the White Water mine, at a depth of 1,600 feet, as this proves that certain ore bodies in that region go down deeper than hitherto proved.

Regina Civic Improvements

The city of Regina will spend \$120,000 during the year on additions and extensions to public works, including the installation of another electric light and power unit, comprising a complete new turbine generator to cost \$120,000.

Snow About 5,000 Years Ago

Scientists say that the snow which was solidified to form the icebergs now floating in the North Atlantic fell in Greenland 5,000 years ago.

First Step Taken In Connection With Fruit Combine Probe

Ottawa.—The seizure by the Royal Canadian Mounted Police of the books of several western fruit companies marks the first step in the prosecution based on the findings of the Duncan commission under the combines investigations act.

J. C. McRuer, K.C., who is conducting the case for the Federal Government, has been in recent conference with Hon. James Murdock, minister of labor, but when approached declined to state what the next action would be.

The report, which found that a fruit combine existed, was tabled in the House of Commons by the minister of labor on February 18.

Under the act the provinces concerned are given three months in which to take up the prosecution. In this case the attorneys-general of the four western provinces indicated that they would prefer to have federal action taken, but promised co-operation. The matter is now in the hands of the department of labor and justice.

Present Dealing With Chinese Firms Risky

Exporters Warned By Trade Commissioner In Shanghai

Ottawa.—Canadian exporters are advised to take extreme care in financial transactions with Chinese firms at the present time, in a message published in the Commercial Intelligence Journal from L. M. Cosgrave, Canadian trade commissioner in Shanghai.

"In view of the disturbed economic conditions in China at the present time, it is advisable that the greatest care be taken by Canadian shippers in regard to financial transactions with Chinese firms," states the message.

"No shipments should be made other than through irrevocable letter of credit, particularly as the dock and shipping situation is extremely uncertain," says the bulletin, which is dated June 15.

Combat Rust Menace

May Eradicate Cereal Rust As Result Of Experiments

Winnipeg.—Favorable progress has been made by the recently appointed federal committee working toward the eradication of cereal rust, according to L. H. Newman, Dominion cerealist.

More than 180 tests were being carried out at the present time on experimental and private farms. "By the fall," Mr. Newman said, "our biological research work should result in our obtaining several rust cultures. We shall then be able to artificially inoculate varieties of rust resistant wheats and so obtain valuable data." If the wheats when soaked with these cultures resist infection, the grain, Mr. Newman declared, would certainly prove immune in the wheat fields of the prairies.

Would Overthrow Mussolini

Alleged International Campaign Against Fascist Regime In Italy

London.—The Daily Telegraph reports the existence of an energetic international campaign to overthrow Mussolini and the Fascist regime in Italy.

"Occult international forces from Wall Street to Vienna, and from Milan to Moscow," it says, "are working to this end, and they have adopted methods akin to those practiced by the Bolsheviks, introducing their own sect against the foreign trade unions. That is to say, emissaries of the forces in question have been enrolled in the ranks of the Fascists for the purpose of sowing dissension and demoralization."

Harvesters From B.C.

Victoria, B.C.—Officials of the British Columbia department of labor here are preparing now for the annual trek of harvesters to the prairies.

Railway officials will confer with representatives of the labor departments of all western provinces in Winnipeg, it was announced. It is anticipated that the fares will be about the same as those in effect last year.

Liberal Regime In N.S. Ends

Halifax.—The 43-year-old regime of Liberal Government in Nova Scotia has ended, and for the first time in that period a Conservative administration, headed by Hon. E. N. Rhodes, has taken possession of the historic provincial building and occupied the administrative chambers.

W. N. U. 1586

Wheat Pool Builds Elevators

To Construct Thirty More Elevators At Saskatchewan Points

Regina.—Construction of a further 30 country elevators at points in the province where it is found impossible to purchase suitable houses has been authorized by the executive of the Saskatchewan wheat pool.

Contracts have been awarded, under the new authorization, for the erection of elevators at the following points: Swift Current, Luseland, Borden, Semans, Aneroid, Valor, Coppen, Shaunavon, La Fleche, Limerick, Hardy, Melaval, Ravenscrag, Spring Valley and Gravelbourg.

If it is found impossible to purchase suitable elevators, it is anticipated that new country elevators will also be built at the following points: Strathburg, Uron, Gull Lake, Polo, North Biggar, Kisbey, Weyburn, Fox Valley, Success and Edgely.

The original elevator building programme adopted some months ago authorized the construction of thirty elevators. Under this programme, elevators have been erected for the pool and are ready to handle grain at Bullock, Balgonie, Indian Head, Quilton, Yellow Grass, Dunblane, Dodsland, Simpson, Vantage, Grayson, Rouleau, Hamlin, Broderick, Disley and Kinley.

Anxious To Extend Knowledge Of Empire

Members of British House of Commons Coming to Canada

London.—A number of members of the British House of Commons will shortly proceed to Canada, thus adopting the advice recently given them as members of the United Kingdom branch of the Empire Parliamentary Association by Premier Baldwin to extend their knowledge of other parts of the world, when the House of Commons is not in session.

The large party, which includes the wives of several prominent members, will attend conferences of the inter-parliamentary union at Washington and Ottawa.

They will leave England September 19. Right Hon. Ramsay MacDonald, former premier, hopes to go to Canada this fall, if other arrangements will allow. According to his present intentions, he will leave on the Megantic, October 2.

Ask Recall of Ambassador

Tehran, Persia.—Reports in well-informed circles here saw that because of pressure of the great powers, China will ask Moscow to recall M. Karakhan, the Russian ambassador to Peking. M. Patsukoff, chief of the eastern section of the Soviet foreign office, will arrive here shortly to recuperate his "health." M. Patsukoff's absence, diplomats here say, will leave vacant a post in which Karakhan would fit admirably.

Geological Survey of Provinces

Regina.—M. Y. Williams, W. D. Dyer and P. S. Warren, of the federal geological survey, department of mines, Ottawa, will make a survey of the geology of southwest Saskatchewan this summer in preparation for the development of the natural resources, according to information received by the province. G. S. Hume will also make a survey in Alberta and Saskatchewan, near Wainwright.

Strong For Bay Railway

Winnipeg.—Demands for immediate completion of the Hudson's Bay Railway, revaluation of soldier settlers' lands, and payment of municipal taxes due on farms abandoned by these settlers, were made in resolutions passed at a meeting of the Manitoba Progressive Party.

Killed By Own Invention

Redwood, Calif.—Gratien Moreau was killed by his invention to check holdup men. He had devised a method for concealing in the coat sleeve a gun which would be discharged automatically as a man put up his hands at the command of the robber.

Japanese Rice Crop May Be Failure

Tokyo.—The weather in Japan has been very cold and wet, resulting in predictions that the rice crop will be a failure. Reports from Korea continue to tell of extensive floods which have caused heavy damage.

Start New Air Mail

London.—Air mail service is now in operation between London, Denmark, Norway and Sweden.

First Child Welfare Congress

Canada Will Be Represented At Geneva Conference In August

Toronto.—First in the history of mankind will be the International Congress on Child Welfare to be held in Geneva from August 24 to 28, plans for which are now almost completed. This great undertaking, organized by the Save-the-Children Fund International Union, will see a remarkable gathering when representatives of more than 10 nations will convene for the purpose of considering and making practicable plans for the benefit of the children of the world; who will then be studied as the people's first asset, to be given first preference in all cases where the welfare of the child is concerned.

The keynote of the discussion and debates will be what is known as the "Declaration of Geneva," or "The Children's Charter," which Canada has already signed in company with most other nations, and adopted by the League of Nations in September, 1924.

Canada has already become interested in the "Children's Charter" through its connection with the International Council of Women. Canada too has worked from coast to coast in the interests of the Save-the-Children Fund, and the Dominion will be represented at the congress by Frank Veigh, Canadian representative of the fund.

Alaskan Village Hit By 'Flu Epidemic

Entire Indian Population Affected and Eight Have Died

Juneau, Alaska.—Eight natives are dead and the entire population affected by an influenza epidemic, which has swept an Indian fishing village on Bristol Bay, bureau of fisheries' representatives in the district reported. Conditions in the region have been improved, "but most of the Indians have been sick and unable to fish and will suffer during the coming winter, if not aided in some way," the report said.

PREMIER KING SAYS NO DATE SET FOR ELECTION

Ottawa.—Premier Mackenzie King states that there would be no decision in regard to an election for some time to come. The premier made this statement at the conclusion of a cabinet meeting which was attended by but five members of the government. Those present, in addition to the premier, were Rt. Hon. G. P. Graham, minister of railways and canals; Hon. Ernest Lapointe, minister of justice; Hon. James Murdock, minister of labor; and Hon. A. B. Cope, secretary of state.

Mr. King said that the meeting had been called for the purpose of disposing of a number of routine matters which have accumulated during the ten days' respite of the cabinet.

"When will the next meeting of the cabinet be held?" he was asked.

"Not for a couple of weeks," he replied.

When asked whether there had been any decision in regard to the calling of a general election, the premier laughed.

"You may be quite sure of one thing. There won't be any decision in regard to an election for a good time to come," he replied.

EXPRESS FEAR OF FUEL SHORTAGE NEXT WINTER

Ottawa.—"The Canadian consumer will be well advised to get in a sufficient supply of whatever fuel he proposes to use next winter, without loss of time," this is the advice given by C. A. Magrath, who was fuel controller during the war, and as a member of the federal advisory fuel committee, had much to do with the arrangements looking to the protection of Canada's interests in the big United States hard coal strike of 1922.

"Seldom has the fuel outlook seemed so threatening as at the present time," says Mr. Magrath in a statement recently issued. He points out that coal miners are on strike in eastern and western Canada, that there is possibility of trouble in the British coal field, and that there is every possibility of a bitter fight in the Pennsylvania coal region at the end of next month.

Want U.S. In World Court

Could Withdraw If Outlawry of War Not Upheld by Europe

Washington.—Certain advocates of the world court, who have been working quietly for months, have come forward with a compromise plan of United States entry, which they will push between now and the time the administration proposals are brought up in the senate in December. The compromise has been hooked up in its conditions, with President Coolidge's proposed conference on limitation of armament.

It provides for entry under the administration proposed, but with the understanding that the United States would withdraw from the court after a specified period if the nations of Europe do not join in a general convention for outlawry of war.

Harvesters From Overseas

Reported That Over Two Thousand Workers Are Coming From Central Europe

Quebec.—Over 2,000 harvesters from European countries are expected to pass through Quebec on their way to the Canadian west from now until the fifteenth of August. The majority of them will be from Hungary, Czechoslovakia and Germany, and the remainder from other countries of central Europe.

In order to obviate the danger of these immigrants becoming public charges when the harvest is gathered, arrangements have been made with western farmers to keep them on throughout the winter at a salary of \$25 a month.

Alberta Legislature

Will Meet August 3 to Hold Short Session

Edmonton.—The adjourned session of the Alberta Legislature will meet August 3, the last named of the several provisional dates announced by the government.

This was decided definitely at a full meeting of the cabinet and steps are being taken accordingly for calling the house together.

Premier Greenfield says the session will necessarily be a short one. With harvest time drawing near, there will be no desire on the part of the country members, at any rate, to prolong it, and quick work is expected.

Vancouver Welcomes Earl Haig

Great British Leader Pleads For Unity and Fellowship

Vancouver.—Unity of effort for the re-establishment of returned soldiers in all parts of the British Empire, was advocated by delegates representing India, Australia, New Zealand, Rhodesia, north and south Ireland, and Great Britain at a dinner given here by a local reception committee to the members of Earl Haig's party, who attended the recent meeting in Ottawa of the Empire Service League, and who came to the coast with the field marshal.

The speakers included Brig.-Gen. H. F. McDonald, Brig.-Gen. James Wylie, of South Africa; Senator James Cornell, of Australia, and others.

The great British leader, in plain language and with modest demeanor, with a manner that left no doubt as to his sincerity of purpose, exhorted all ex-service men to unite under the one banner in friendship, unity and purpose, a purpose that would make for the British Empire and the ushering in of world peace.

"In the interests of liberty, justice and good fellowship and peace, I hope it will not be long before Canadian ex-service men will be united," declared Earl Haig, in his closing sentence amid applause that swept through the great building.

Alberta Hail Loss

Over Seven Million Dollars Damage Is Reported Already

Edmonton.—More than seven million dollars damage by hail has been done to grain crops in Alberta this summer, according to information received by the provincial department of agriculture. The department has been investigating the situation and has been getting reports from all the hail insurance companies and the municipal hail insurance board, which go to show that about 3,000 claims for damage by hail have been received to date.

Hon. George Hoadley, minister of agriculture, points out that at a fair average of 100 acres per claim and on the basis of total loss, as usually figured by the insurance companies, with an estimated value of \$1.50 per bushel of wheat, there will be a loss of \$25 per acre, or \$7,500,000 as a total loss, to be deducted from the province's grain yield this year.

A Long Cruise

Canadian Government Vessel From Vancouver Reaches Atlantic Ports

St. John, N.B.—The Canadian Government Merchant Marine steamer Canadian Prospector, Captain Arthur Thomson, has arrived in port from Vancouver, via the Panama Canal, on the initial trip in the inter-coastal service. The ship brought a full general cargo of 5,000 tons, including about four million feet of hard pine, a large quantity of the latter being piled high on the deck. After discharging at this port, she will take the remainder to Quebec, Three Rivers and Montreal.

TO FURTHER THE INTERESTS OF WESTERN CANADA

Edmonton.—The spirit of co-operation between the prairie provinces and the Pacific coast which has been developed in the conference of western mayors and other civic officials held here, is to be carried into a permanent organization as a result of a decision at the closing session. An executive committee of six members was named, composed of Mayor L. D. Taylor and ex-Mayor R. H. Gale, of Vancouver, for British Columbia; Mayor Hardie, Lethbridge, and Mayor Blatchford, Edmonton, for Alberta; and Mayor Howard McLaren, of Biggar, and Mayor J. R. Gregory, of North Battleford, for Saskatchewan. This committee will have power to add to its number, and it has been instructed to continue the work begun and to arrange for further conventions at future dates.

After a lengthy discussion, it was decided that the government be asked to abolish the permit system for the shipment of grain westward. An amendment sought to refer the question to the executive committee for action, but Mayor Taylor, Mayor Blatchford, and G. G. McGeer, K.C., urged strongly that the conference take action at once in urging that the system be abolished, and the shipper be given the same privilege of shipping to the west that he now possesses to ship to the east.

British Government Maintains Secrecy On Naval Programme

Will Hear Cases In West

New Commissioner of Reparations Leaving Ottawa About August 1

Ottawa.—The new reparations commissioner, James Friel, K.C., will leave for the west to hear cases about the first of next month.

Commissioner Friel will make his first stop at Winnipeg on or about August 3, where he will hold sittings for applicants who have not yet been heard.

His itinerary includes stops for hearings at Regina, about August 5; Saskatoon, August 7; Edmonton, August 10; Calgary, August 12; Kamloops, August 17; Vancouver, August 18; and Victoria, August 24.

The dates are necessarily subject to change, depending on how long the commissioner is required to stay in the different cities which he visits.

Canada Wins MacKinnon Cup

Made Highest Score at Biale; England Came Second

Bieleys Camp.—Canada won the MacKinnon Challenge Cup, open to teams of 12 at 900 and 1,000 yards, ten shots and one sighting shot per man at each distance, time limit one hour and a half.

Canada's score was 1,081 out of a possible 1,200.

England scored 1,065, Scotland 1,061. The prize in the MacKinnon event is a challenge cup given in 1891 by the late Col. MacKinnon. Special commemorative souvenirs will be given by the National Rifle Association to the captain and adjutant and each member of the winning Canadian team.

Council On Marketing

Manitoba To Have New Body For Co-operative Marketing

Winnipeg.—Formation of an advisory council on co-operative marketing in Manitoba was announced by Premier Bracken. The purpose of the council, as outlined by the premier, is to establish a closer working arrangement between the various marketing units already established.

The council also would provide a body where practical experience and knowledge will be pooled for mutual benefit and advancement of sound co-operation. N. C. MacKay, director of agricultural extension, has been appointed chairman.

SUNDAY SCHOOL LESSON

JULY 26

THE COUNCIL AT JERUSALEM

Golden Text: We believe that we shall be saved through the grace of the Lord Jesus. Acts 15:11.

Lesson: Acts 15:1-25.

Devotional Reading: Romans 5:1-9.

The Text Explained and Illumined

Trouble at Antioch of Syria, verse 1.—As our last lesson stated, Paul reported to the church at Antioch in Syria "all things that God had done with them," and gave as the great result of their work the fact that "God had opened a door of faith unto the Gentiles." When the news reached the church at Jerusalem, they found the door into the Gentiles too wide ajar to suit them.

Until Paul took up the work, the Christian churches, like the Jewish synagogues, had been composed of Jews and proselytes, the proselytes being Gentiles who had received the Jewish rite of circumcision. In attendance at the services there were also the "God-fearing" or "devout" Gentiles who, not having been circumcised, were not in "full fellowship" with the rest. That God was no respecter of persons Peter had learned at Joppa, and the Jerusalem Church, after hearing all the circumstances in regard to the baptism of the Gentile Cornelius and his household, had glorified God, saying, "Then to the Gentiles also hath God granted repentance unto life."

The truth, however, had been applied in only a few special cases, and the far-reaching consequences to the Church had not been foreseen. Now a crisis was reached. Certain members of the Jerusalem Church came to Antioch and declared that unless all were circumcised according to the custom of Moses, they could not be saved, thus insisting that Gentiles must first become proselytes before they could become Christians.

Dirigible Flight to Pole

Berlin.—The United States was asked to join Germany in a dirigible expedition to the North Pole, each country to fly its own giant airship, but with the two keeping in constant touch and assisting and supplementing each other. The invitation was extended by Dr. Hugo Eckener, pilot in its trans-Atlantic delivery of the naval dirigible, Los Angeles.

London.—Recent efforts in the House of Commons to induce the government to reveal its naval building programme were repeated, but without success, in debate on the naval estimates. It is generally understood that there has been a sharp conflict between Winston Churchill, chancellor of the exchequer, who desires to keep the estimates down, and the admiralty, which wants a cruiser-building programme extending over a period of years.

Apparently divided counsels prevail in the cabinet, which has not yet reached a unanimous decision, although it is rumored that Mr. Churchill has consented to the laying down of five new cruisers this year.

The subject was discussed in the house from all angles, with much advocacy of another disarmament conference. W. C. Bridgeman, first lord of the admiralty, could only repeat Premier Baldwin's previous promise to make a statement on the question about a week hence.

Canada's Motor Car Production

Lower Than In 1923 But Exceeds Other Years

Ottawa.—Canada produced a total of 132,580 motor cars during the past year, a decrease of nine per cent. from the maximum attained in 1923, but exceeding in number the production of any other year.

The output in 1924, according to the Dominion bureau of statistics, included 98,365 passenger cars, 18,043 trucks, and 16,172 chassis, valued in the aggregate at \$88,180,418, at factory selling prices. Capital invested reached a high point in the industry at \$60,766,886, as contrasted with slightly more than \$60,000,000 in 1923.

Heavy Loss From Hail

Approximately 350,000 Acres Damaged In Saskatchewan

Regina.—Between 1,000 and 1,200 farmers will claim insurance aid as the result of the hail damage to crops in southern Saskatchewan by the cyclonic hailstorm last week. It was estimated by insurance companies' officials. The claims will range from 20 to 100 per cent.

From reports received from the districts visited by the hailstorm, approximately 350,000 acres were damaged, and the loss on this acreage will average 50 per cent. A large number of farms reported hail losses of 100 per cent., and very few were as low as 40 per cent.

France Receives Canadian Beaver

Government Sent Pair From Jasper Park to Lyons

Ottawa.—The commissioner of Canadian National Parks has received advice from the mayor of Lyons, France, that the pair of Canadian beaver shipped to that municipality recently has safely reached its destination.

These animals were captured in Jasper National Park and sent as a gift from the Canadian Government to the city of southern France, where they have been placed in suitably prepared quarters in the Parc de la Fete d'Or.

Elevator For Lethbridge

Lethbridge, Alta. — Announcement was made by George W. Green, general manager of the Ellison Milling and Elevator Company, of plans to erect here, this fall the first unit of a million-bushel storage elevator, with cleaning and treating plant capable of handling 20 cars daily. The company will also add to its line elevators by erecting three in the Lethbridge northern project. The Ellison Milling Company is financed by Utah capital.

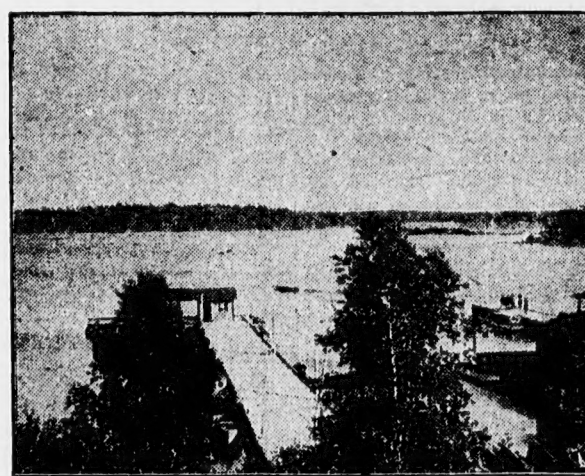

U.S. Veterans May Assist French

Paris.—Some ten or twelve United States veterans of the Lafayette escadron and foreign legion, will soon enter the service, nominally, of the Sultan of Morocco, but in reality of the French army, in an attempt to crush Abd-El-Krim, if the plans of Premier Poincare are perfected.

Italy Has Right Idea

Rome.—There is always a good attendance at the sessions of the Roman senate, in marked contrast to the many empty seats at meetings of the Canadian senate. Italian senators are paid only for the sessions they attend.

THE WHARF AT MINAKI INN

The fire demon was unkind to the Canadian Weekly Newspaper Association delegates when he razed Minaki Inn, where the members of the party were to have spent Saturday and Sunday as guests of the Canadian National Railways. However, some of the members of the party were able to secure reservations at Minaki Lodge for a day or so on their return journey and this is a sample of the scenery which greeted them there.

Fifty-Five Years Ago

SINCE 1869 this Bank has been identified inseparably with the development and progress of the Dominion. A Canadian institution, energized and directed by Canadians, it serves every phase of our business and private life at home, and has played no small part in the steady expansion of Canadian trade in foreign markets.

From a small beginning it has grown through sound business principles to a place among the largest and strongest banks of the world.

You will find this Bank a sympathetic factor in your business and private banking.

Every Monday—M. D. Powers, the Eye Specialist at the Queen's Hotel

TOWN AND DISTRICT

And the harvest is here.

It is hot work keeping cool these days

When business is dull is the time advertising counts most.

The hum of the binder is once again heard throughout the district.

Who will have the biggest yield of wheat this year?

There are some mighty fine fields of grain in this district right now.

Still hundreds of tourists pass on through Gleichen on their way east and west.

Most people can qualify to attend the Hard Times Dance at Arrowood Friday night.

Sorry for the fellows who were hit by hail this year, but it is lucky there were so few.

Mrs. Ed. Menard and her mother spent several days last week visiting friends in Calgary.

As per usual the machine men are busy selling repair parts, and the other fellow getting them.

All K. of K. members are requested to attend Golden Jubilee next Monday Aug. 10. Important business and degree work.

Sunday was extremely hot all day. Around supper time a severe wind storm swept the town and district, but no damage or hail followed as many expected.

In the absence of the minister the evening service in the United Church will be conducted by Mr. Van Schuyk of Brandon College. Mr. Van Schuyk is a graduate of McMaster University, Toronto. It is hoped that there will be a good attendance.

Major and Mrs. Lewis have kindly consented to have the Anglican Sunday School picnic on their grounds on Wednesday afternoon, August 12th. Parents, members of the congregation and their friends are cordially invited. Kindly bring your lunches.

The Rev. and Mrs. Bevan were in Chancellor on Monday. Mr. Bevan officiated at the wedding of Miss Alice Toogood and Mr. Charles C. Reiffenstein. The ceremony took place in the Memorial Hall and was the outstanding event of the season.

Miss Lucy Morton and Vivian Brown rode in from Jack Morton's ranch last Friday and spent a couple of days at the latter's home, returning on their ponies Sunday. A ride of sixty miles is now becoming rather unusual but these young ladies think it just a nice jaunt.

Some farmers are finding a peculiar condition of grain this season. Fields of grain that appear to be ripe from a casual look at the straw is not ready to cut. The straw being quite brown and the heads white and soft. The kernel it is expected will soon ripen however.

The swimming pool in the back-water of the Bow, near North Camp continues to be a very popular resort, each evening and many visit there in the afternoons. Sunday several hundred took the advantage afforded for swimming and many a pleasant picnic party was enjoyed.

A V Coeks, K of R and S of Golden Jubilee Lodge, Knights of Pythias, attended a two-day session of the Grand Lodge at Calgary last week as the delegate from the local lodge. He was much impressed with all he saw and learned and will have something worth reporting next Monday night.
